„I LIKE YOUR MUSIC - KEEP ROLLING THAT ROCK!"

this statement by Paul Rodgers felt like an accolade for Joe Fischer! That was and is the motivation to continue and to create the band "Blue Deal".

Originating in the 'Southern Black Forest', Blue Deal comes across as fresh and powerful. A cross-generational project, which is also reflected in the songs on the debut album 'Holy Ground'.

Despite the 30-year age difference from the youngest to the eldest band member, the four understand their craft and, due to this unique and varied musical spectrum, cleverly merge different styles and approaches.

With three tours through Scotland, the band has proven that blues rock "Made in Germany" can be authentic and internationally successful.
